

Afrânio Cavalcante

Product Manager | SaaS & AI Platforms

São Paulo, Brazil | +55 61 9 8328 7541 | e-mail: hi@afrazio.pm | linkedin.com/in/afraziocavalcante | Portfolio: afrazio.pm

SUMMARY

Product Manager with 5 years of experience building and scaling B2B SaaS products — from discovery to enterprise-scale delivery. At Weni by VTEX, I led AI-powered product modules, including Weni Insights, an analytics layer that used artificial intelligence to interpret conversation data and generate actionable insights, resulting in a 100% migration of the client base and 300% growth in concurrent users. At QuarkRH, I drove a product and organizational transformation that delivered 40% growth in the customer base in 8 months, 1,000 active clients, and 3 new modules, including an AI-powered HR feature. Solid track record in roadmap strategy, continuous discovery, stakeholder management, and building data-driven product cultures.

PROFESSIONAL EXPERIENCE

Product Manager — QuarkRH | Remote, Brazil | Oct 2024 – Nov 2025

B2B SaaS people management platform — HR administration, time tracking, PPE management, and HR analytics. 1,000+ active clients.

- Grew the customer base by 40% in ~8 months, reaching 1,000 active clients and over 3 million time-tracking records on the platform.
- Structured the product organization into two independent squads, directly hiring and managing 2 Product Owners — each team focused on a specific domain, increasing delivery throughput across the platform.
- Led the refactor of the HR Administration module alongside the Tech Lead — reducing critical bugs, rebuilding client trust, and cutting monthly churn by ~5 clients.
- Launched 3 new modules: AI-powered HR automation, an anonymous reporting channel, and PPE management — the PPE module exceeded adoption expectations, becoming one of the platform's fastest-adopted features.
- Reduced product churn by improving platform stability and feature adoption, transforming the company from a reactive operation into a scalable product strategy.

Product Manager — Weni by VTEX | Remote, Brazil | Oct 2021 – Oct 2024

B2B SaaS customer engagement platform combining AI-powered chatbot automation with human support. Acquired by VTEX. 500+ enterprise clients across Latin America.

- Led the discovery and development of Weni Chats — a unified human and automated service module that cut client time-to-live to under 1 day in most operations.
- Created Weni Insights — an AI-powered analytics module with sales-funnel metrics that automatically interpreted conversation data and generated actionable insights, eliminating the need for manual analysis.
- Drove the migration of 100% of the client base to the new modules and grew concurrent users by 300% through roadmap prioritization and scalability improvements.
- Implemented continuous discovery practices, defined the product metrics that guided the roadmap, and coordinated cross-functional teams across backend, frontend, UX, and UI.

EDUCATION

Postgraduate Specialization in Project Management

Fundação Getúlio Vargas (FGV), RJ, Brazil – Completed June 2022

Bachelor's Degree in International Relations

Universidade Estadual da Paraíba, PB, Brazil – Completed June 2021
