PROFESSIONAL EXPERIENCE

Product Manager

QuarkRH, BR - Remote 10/2024 to 11/2025

Responsibilities:

- Managed HR platform functionality, leading scope definition, backlog prioritization and strategic alignment with business areas, increasing the predictability of team deliveries.
- Conducted surveys with users and feedback analysis to guide continuous improvements, increasing the adherence of solutions to the real needs of customers.
- Worked in partnership with engineering and design in the construction and evolution of functionalities, using usage metrics to validate the impact and guide product decisions.
- Defined performance indicators and followed the results of released features, strengthening the data-based decision culture within the team.

Product Manager

Weni by VTEX, BR - Remote 10/2021 to 10/2024

Responsibilities:

- Led the discovery and development of the Weni Chats (human service) and Insights (data) modules, using agile practices and collaboration with engineering and design teams, resulting in the migration of 100% of the customer base to the new products.

- Conducted the prioritization of roadmap and definition of requirements with internal and external stakeholders, using usage metrics and customer feedback, increasing by 300% the average of simultaneous users on the platform.
- Implemented continuous Product discovery processes, reducing rework and accelerating delivery of critical features for the business.
- Coordinated multifunctional teams (backend, frontend, UX and UI) throughout the entire product life cycle, ensuring alignment between business objectives and technical solutions.
- Structured product metrics and performance monitoring to guide strategic decisions and support the scalability of the SaaS platform.
