SUMMARY

Product Manager with 5 years building and scaling B2B SaaS products — from discovery to enterprise-grade delivery. At Weni by VTEX, led AI-driven product modules including Weni Insights, an analytics layer that used AI to interpret conversation data and surface actionable insights, driving 100% customer base migration and 300% growth in concurrent users. At QuarkRH, led product and organizational transformation delivering 40% client base growth in 8 months, 1,000 active clients, and 3 new modules including an AI-powered HR feature. Strong track record in roadmap strategy, continuous discovery, stakeholder alignment, and building data-informed product cultures.

PROFESSIONAL EXPERIENCE

Product Manager — QuarkRH | Remote, Brazil | Oct 2024 – Nov 2025

B2B SaaS for HR management — payroll, time tracking, EPI, and people analytics. 1,000+ active clients.

- Grew the client base by 40% in ~8 months, reaching 1,000 active clients and 3M+ time-tracking records on the platform.
- Structured product org into two independent squads, hiring and directly managing 2 Product Owners — each team focused on a specific domain, increasing delivery throughput across the platform.
- Led core refactoring of the Departamento Pessoal module with the Tech Lead — reducing critical errors, rebuilding client trust, and cutting monthly churn by ~5 clients.
- Launched 3 new modules: AI-powered HR automation, anonymous whistleblowing channel, and EPI management — the EPI module exceeded adoption expectations, becoming one of the fastest-adopted features on the platform.
- Reduced product churn by improving platform stability and feature adoption, shifting the company from reactive operations to a scalable product strategy.

Product Manager — Weni by VTEX | Remote, Brazil | Oct 2021 – Oct 2024

B2B SaaS for customer engagement combining AI chatbot automation and human support. Acquired by VTEX. 500+ enterprise clients across Latin America.

- Led discovery and development of Weni Chats — a unified human + automated support module that reduced client time-to-live to under 1 day for most operations, reaching a peak of 3,000 simultaneous agents on the platform.
- Built Weni Insights — an AI-powered analytics module with sales funnel metrics that automatically interpreted conversation data and surfaced actionable insights, eliminating the need for manual analysis.
- Drove 100% customer base migration to the new platform modules and grew concurrent users by 300% through roadmap prioritization and scalability improvements.
- Weni Insights processed 200K+ conversations in its first month — reducing client data access time from ~15 minutes to under 5 minutes, with immediate adoption by the platform's largest enterprise accounts.
- Established continuous discovery practices, defined KPI frameworks, and coordinated multidisciplinary teams across backend, frontend, UX, and UI.
