PROFESSIONAL SUMMARY

Product Manager with more than 5 years of experience in product discovery, stakeholder management, and data-driven decision-making. Proven ability to lead multidisciplinary teams, define product strategy, and transform business needs into scalable digital solutions. Experienced in delivering SaaS products, customer experience improvements, and growth initiatives across different stages of product maturity. Strong background in roadmap planning, metrics definition, and continuous discovery. Close collaboration with engineering, design, and business teams to generate impact through experimentation and iteration. Recognized for combining strategic thinking with hands-on execution to achieve measurable results.

SKILLS

Proficient: Product Discovery, Product Strategy, Roadmap Planning, Stakeholder Management, Agile Methodologies, Data-Driven Decision-Making, User Research, Metrics and KPI Definition, Backlog Management, Cross-Functional Team Leadership, UX Collaboration, Business Analysis.

Intermediate: SQL, Analytics Tools, Product Marketing, API Concepts.

Beginner: Figma (Prototyping), Technical Documentation, Data Visualization (Power BI / Looker).

PROFESSIONAL EXPERIENCE

Product Manager

QuarkRH, Brazil – Remote | 10/2024 to 11/2025

Responsibilities:

- Managed HR platform features, leading scope definition, backlog prioritization, and strategic alignment with business areas, increasing delivery predictability for the team.
- Conducted user research and feedback analysis to guide continuous improvements, increasing solution adherence to real customer needs.
- Partnered with engineering and design teams in building and evolving features, using usage metrics to validate impact and guide product decisions.
- Defined performance indicators and monitored launched feature results, strengthening the team's data-driven culture.

Product Manager

Weni by VTEX, Brazil – Remote | 10/2021 to 10/2024

Responsibilities:

- Led the discovery and development of the Weni Chats (human support) and Insights (data) modules, using agile practices and collaboration with engineering and design teams, resulting in the migration of 100% of the

customer base to the new products.

- Led roadmap prioritization and requirement definition with internal and external stakeholders, using usage metrics and customer feedback, increasing the average number of simultaneous users on the platform by 300%.
- Implemented continuous product discovery processes, reducing rework and accelerating the delivery of critical business features.
- Coordinated cross-functional teams (backend, frontend, UX, and UI) throughout the entire product lifecycle, ensuring alignment between business objectives and technical solutions.
- Structured product metrics and performance monitoring to support strategic decisions and platform scalability.
